President of Aldermen Protests

in Vain Against the McAneny Report.

The Board of Estimate, by a vote of to 3, committed the city to-day to the financing of the \$300,000,000 dual system of Interborough-B. R. T. subways by the adoption of the McAneny report. The Board's approval came after a prolonged and at times trascible discussion of the terms of the resolution in which President MoAneny determinedly upheld his report against the seemingly ndless objections of President Mitchel of the Board of Aldermen-the sole discenting voice in the Board.

The resolution authorizes the Public Service Commission to draw up contracts for the dual subways, gives the Interborough's backers, J. P. Morgan & Co., the city's moral pledge that such contracts will be carried out to the exten of the \$100,000,000 and the B. R. T.'s okere, Kuhn, Loeb & Co., similar asgrances to the extent of \$60,000,000. The lasce is to be paid by the city.

Seth Low spoke, extolling ing the "best plan ever submitted" to relieve New York's transportation congestion. He ventured to predict that future generations of New Yorkers hold these officials in grateful remembrance. He spoke plainly in support of the Interborough's part in the scheme and said the only objection he sees in the resolution is that the committee has not provided for new subways after these now contemplated are completed.
